### Position Summary: Describe below the primary purpose and function of this job.

Conduct business process analyses, needs assessments, and preliminary cost/benefit analyses in an effort to align information technology solutions with business initiatives. Prepare functional, system and program specifications.

### Key Roles & Responsibilities: List up to 6 key roles and responsibilities of this job.

1. Formulate and define systems scope and objectives based on both user needs and a good understanding of applicable business systems and industry requirements.

2. Devise or modify procedures to solve complex or unprecedented problems considering computer equipment capacity and limitations, operating time and form of desired results.

3. Analyze business and user needs, documentation of requirements, and translation into proper system requirement specifications. Participate in requirements planning and feasibility determination.

4. Determine and recommend programs required for optimal problem solution within cost/performance objectives.

5. Perform analyses and prepare reports in order to ensure that programs meet or exceed schedule commitments.

6. Participate in cross-functional project teams and may manage portions of the project life cycle. May function in project capacities including (but not limited to): requirements gathering, functional design, functional configuration, testing, and documentation.

### Expertise: Describe the requirement for knowledge and expertise about the subject area as well as how various parts of the University work together to achieve objectives. Explain the degree of understanding required of the industry and university environment.

As a senior staff member, incumbent is required to have an advanced understanding of his/her discipline including all required certifications as well as an advanced understanding of the business environment of a large university system. Incumbent must demonstrate an in-depth understanding of the University system, its policies, and its operating procedures. Incumbent must have demonstrated project management skills and the ability to work within a matrixed environment if necessary. Incumbent is expected to maintain currency of knowledge with respect to relevant state-of-the-art technology, equipment, and/or systems.

Incumbent should have advanced knowledge of business systems analysis; current technological developments/trends in area of expertise; relevant multi-user computer systems, applications, and/or equipment; and computer flow charts and programming logic. Expertise must include knowledge about the requirements and best practices for developing large or complex software systems. Incumbent must also have the ability to investigate and analyze information, draw conclusions and present recommendations.

### Problem Solving: Describe the nature and complexity of the problems this position encounters on a recurring basis. Include information regarding the level of innovation required, if any, and include mention of environmental factors that may add to the complexity of resolving issues.

Incumbent will address complex problems and will use experience and judgment in creating solutions. Incumbent seeks assistance when significant deviations are proposed, or when unprecedented problems arise. Incumbent develops approaches to problem-solving and anticipates/mitigates potential issues.
Impact is felt within the team/department for which the incumbent works and within multiple, coordinating departments. Work quality, decision-making and long-term project management can affect the productivity of students, faculty and/or staff. Impact of errors is substantial and usually university-wide though mostly short-lived.

Interactions are with fellow team members and coordinating team members, but the incumbent will also have interactions with assigned student, faculty, or staff clients. Incumbent works with and may manage external vendors and service providers. Incumbent should possess superior verbal and written communication skills to convey technical guidance and information to users and to provide excellent customer service. Incumbent will train and provide guidance to more junior staff members and provide management with input into performance evaluations. Incumbent may provide guidance to management on critical technology issues. Incumbent is recognized as an technical authority within the University.

Distinguishing Characteristics

This is the senior or lead level for the discipline. Incumbent possesses all requirements and skills for Level 3 and has achieved proficiency in the typical tasks assigned to Level 3.

- **Skills:** Distinguished from Level 3 skills in that the Level 4 incumbent has fully developed and regularly applies his/her advanced technical skills.
- **Level of Work:** Distinguished from Level 3 work by highly complex and strategically significant activities. Assignments at Level 4 are usually long-term and the incumbent has significant latitude to devise the approach and method to performing the assignment.
- **Supervision:** Distinguished from Level 3 by the complexity and duration of assignments. Level 4 assignments are typically multi-faceted, may be cross-discipline and require significant coordination and planning by the incumbent. Level 4 incumbents regularly perform long-term and non-routine assignments with only general supervisory intervention. Also distinguished from Level 3 in that the incumbent serves as a resource to Level 1, 2 and 3 incumbents on complex problems. Level 4 incumbents will often train Level 1, 2 and 3 incumbents on work processes and policies and assist management with developing their technical skills. Level 4 has input into hiring decisions and staff performance assessments, but does not directly supervise.
- **Interactions:** Distinguished from Level 3 in that the Level 4 incumbent regularly works beyond his/her own team and often externally. The Level 4 incumbent regularly works with related teams, client groups, management and vendors and interactions may include influencing others.
- **Focus:** Distinguished from Level 3 in that the Level 4 incumbent regularly works toward specific team goals and client goals, and assists in establishing department processes and standards.

Job Requirements And Qualifications:

**Minimum Education:** Bachelor’s degree or equivalent experience in Computer Science, MIS, Computer Engineering or related disciplines.

**Preferred Education:** Master's degree or other post-graduate training in Computer Science, MIS, Computer Engineering or related discipline.

**Minimum Experience:** 5-7 years

**Preferred Experience:** 7-10 years

Required Licenses/Certifications:
