Support like never before

Aetna Health Connections℠ Health and Wellness Resources
Disease Management Program

Finally ... a program that focuses on you, not just your condition

We want you to know®
Reach your own level of good health

Not everyone can be perfectly healthy. But, even with an ongoing health condition, you can reach your own level of good health. Our disease management program can help.

In this program, you can learn how to:

■ Get the treatment and preventive care appropriate for you
■ Understand and follow your doctor’s treatment plan
■ Better manage your ongoing conditions
■ Make changes to reach your personal health goals
■ Identify and manage your risks for other conditions

You get this program as part of your Aetna health benefits or health insurance plan. There’s nothing extra to pay, and participating is up to you.

Get support from nurses for a healthier you

Our nurses and clinicians can support you even if you have more than one condition. You get this support all in one program, and you get:

■ Educational materials mailed to you
■ Online resources you can use anytime
■ Nurse case management if you’re high risk

State-of-the-art technology that looks out for your health and safety

We focus on you, not your condition, so we can help you with your health needs.

Our goal is to make it easier for you to manage your conditions and live your life well.

Let us help you protect your health

Another way we help is by putting our technology to work for you.

Our CareEngine® system continuously scans your health data. It compares it with current guidelines of care to help:

■ Identify potential gaps, errors, and duplications in care
■ Remind you to get the preventive care you need
■ Search for potentially dangerous interactions, such as two drugs that shouldn’t be taken together

Our system can also notify your doctor to consider:

■ Stopping a treatment
■ Adding a treatment
■ Trying a procedure or test not yet given

You may also receive a call or a letter, depending on the situation.

Support for more than 35 conditions

**Heart and blood system**
- Heart failure
- Diabetes (adult and child)

- Cystic fibrosis
- HIV (human immunodeficiency virus)
- Weight management (adult and child)
- Depression*

*Occurring with another condition.

---

**HOW OUR PROGRAM CAN WORK FOR YOU**

As an example, let’s say you have diabetes. You may contact us to join. Or, we contact you to see if you want help managing your health issues.

Our nurses then can:

- Teach you about and send you information on diabetes
- Give you online resources to use anytime
- Review the treatment plan and medications your doctor gave you
- Explain possible side effects and answer your questions
- Give you our 24-hour, toll-free disease management phone number
- Work with you over time to help you meet your goals for managing diabetes and other health conditions. After speaking with a nurse, you will receive a letter. The letter will list points you discussed and steps you should take before your next discussion with a nurse.

Our support team can help you learn how to help protect yourself from future health problems.
Getting started is easy

We may identify you for program participation through:

- Your doctor or self-referral
- Your request submitted through the Aetna Navigator® member website at www.aetna.com
- Our patient management staff
- Medical and pharmacy claims data

If you are an Aetna member and have one of the conditions listed, call us at 1-866-269-4500 to get started. Or, call us if you think you’re at risk for one of the conditions.

The more quickly you act, the more in control you can be.

We give you the information and resources you need. You decide what’s best for you.

Let our disease management program help you live your best life.

If you’re not yet an Aetna member, talk to your benefits administrator. Go to www.aetna.com for more information.

This material is for information only. Health information programs provide general health information and are not a substitute for diagnosis or treatment by a physician or other health care professional. Health benefits and health insurance plans contain exclusions and limitations. Not all services are covered. See plan documents for a complete description of benefits, exclusions, limitations and conditions of coverage. Plan features and availability may vary by location and group size and are subject to change. Information is believed to be accurate as of the production date; however, it is subject to change.
